

Kind reminding for clients:

1. Even low price gives the short satisfaction on the printer itself, it will only bring the disasters when you use it for its low quality
2. It is unworthy to buy low quality products only for its low price. The loss will outweigh the gain, because what you bought cannot meet your demand.
3. Only when you are foresighted enough to invest on high-quality and competitive products and with the good after-sale service, double or triple return can be achieved than the average industry standard.

Focus on
high speed UV printing,
to meet the customer's
satisfaction

**Production Speed up 30%

- Eco-solvent series (Epson)
- Solvent Series(Konica Minolta)
- UV Series (Konica Minolta)

Zhejiang Yurong Digital Printing Technology Co., Ltd.

ALLWIN brand was established in 2007, which is a printer manufacturer of R&D manufacturing, sales and service. **The brand value is stable & high quality printing and the target customers are professional processing producers.** In 10 years, ALLWIN brand quickly becomes the high-end brand of made-in-China solvent and eco solvent printer and is well recognized by professional customers for its clear positioning of target customers' demand, integration of internal and full chain resources, focus on stable & reliable & durable industrial products.

At the beginning of 2017, a new modern factory building with an area of 35,200 square meters was put into use. At the same time, a number of executives with backgrounds in international industrial enterprises were hired to join the company to enhance the management capabilities of ALLWIN in new product development and product manufacturing processes. At present, **ALLWIN has successfully provided mass-produced OEM products for a well-known Japanese international company.** The products are continuously flowing to the international market through their sales channels.

ALLWIN pays great attention to R&D investment and has a number of national inventions, software copyrights and utility model patents. In 2000-2023, due to good reputation among customers and steady growth in sales, **ALLWIN is the only company won the title of Excellent Partner in China from KONICA MINOLTA for 15 consecutive years.**

ALLWIN will further focus on the core categories and provide products and service that keep pace with the times and achieve customers' leading position in the industry.

- ★ 2012-2014 3 Invention Patents, 21 utility model patents
- ★ 2015-2017 1 Invention Patent, 19 utility model patents
- ★ 2018-2024 5 Invention Patents, 16 utility model patents

For its stable quality, and excellent sales, ALLWIN is the only company won the title of Excellent Partner in China from **KONICA MINOLTA** for 15 consecutive years.

**Focus on high speed UV printing,
to meet the customer's satisfaction**

ALLWIN Patented Technology

Nozzle Laser Detection and Compensation

Focus on high speed printing,
to meet the customer's satisfaction

◆ Laser Detection Theory

Use Laser to detect print head nozzles fire ink or not. Software automatically calculate the compensation position according to the detection. Then printing software will use normal nozzle to print instead of the missing nozzles in next PASS. This will make printing effect like new print head.

Print head amount	Derect use time
1 nozzle	0.002ms
1 head	$3200 \text{ Nozzle} \times 0.002 = 6.4\text{ms}$
2 head	$6400 \text{ Nozzle} \times 0.002 = 12.8\text{ms}$
4 head	$12800 \text{ Nozzle} \times 0.002 = 25.6\text{ms}$
6 head	$19200 \text{ Nozzle} \times 0.002 = 38.4\text{ms}$

After the machine is used for a period of time. Head cap will not perfectly match with printhead during cleaning if not replace new one, few nozzles will not work properly after cleaning. In addition when machine works longer, more nozzles will be totally blocked.

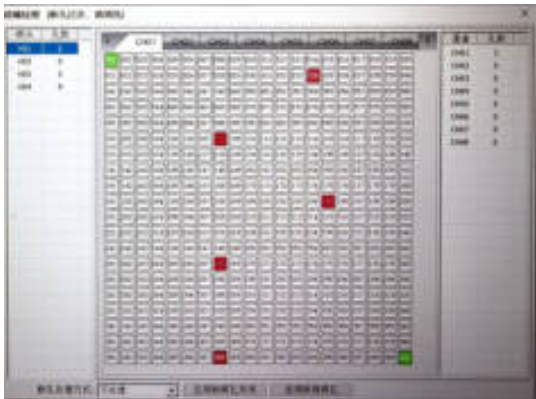

If print head missing nozzle will make output jobs with banding and low quality, especially in solid color and gradient color job. Directly cause customer dissatisfaction or loss of orders, affect customer loyalty and direct economic losses, and further affect the development and growth of enterprises.

ALLWIN Patented technology - laser detection of nozzle blockage and automatic compensation technology help you solve the problem. Through this technology, the quality of each picture is comparable to that of the new nozzle. Few missing nozzles can print almost the same quality of the new nozzle, to achieve large orders.

◆ Laser Detection schematic diagram

◆ Detect result will map in software, Red position shows the nozzles without firing, when printing will compensate automatically.

* Head Nozzles missing make banding

* Use Compensation output near perfect

Machine much more Convience to use, print perfect quality job

ALLWIN Patents *Leading Position in China*

ALLWIN ONE TIME SUCCESSFUL HEAD CLEANING SYSTEM

More Eco-solvent printer heads, faster production speed, increase probability of nozzle missing.

Multi-heads printers not easy to maintenance heads when nozzle missing, frequent maintenance affects production efficiency

Frequent head maintenance wastes ink , reduces the production efficiency. You need one time successful cleaning head.

NOZZLE LASER DETECTION AND COMPENSATION SYSTEM

If print head missing nozzle will make output jobs with banding and low quality, especially in solid color and gradient color job. Directly cause customer dissatisfaction or loss of orders, affect customer loyalty and direct economic losses, and further affect the development and growth of enterprises.

ALLWIN Patented technology - laser detection of nozzle blockage and automatic compensation technology help you solve the problem. Through this technology, the quality of each picture is comparable to that of the new nozzle. Few missing nozzles can print almost the same quality of the new nozzle, to achieve large orders.

The Leader of Stable Printing !

AW-EP19 8 heads printer

Using heavy duty feeding & collecting system, can handle 500 meters large roll material to ensure high speed printing without deviation and wrinkling, and instant drying in the same time

248m²/h

AW-EP32 2/4/8 heads printer

280m²/h

1. The upgrade of the absorption platform will possess levelling function for ensuring the precise fall of the ink drop and the high precision printing;
2. The whole beam is strengthened and fixed at multiposition and improves the parallel accuracy of the guide rail and the beam, making the machine run more stably;

3. Screw drive cleaning structure, improve the moisture accuracy of ink cup;
4. The feeding and winding system with the balance bar driven by the professional bearing with rack ensures that the both ends of the material are always kept at the same height in the printing process.

Model		AW-EP19 8 heads printer

▲ The pinch roller assembly adopts the Eco solvent machine pinch roller structure, which makes the picture combination more precise, the stitching is more perfect, and the fan power is larger;

▲ Intelligent infrared drying system, printing start/stop, infrared automatic open and close;

▲ The feeding system adopts built-in movable media fixing structure to prevent the material from deviation;

▲ Standard negative pressure system, continuous printing without nozzle missing;

▲ Adopting reflective photoelectric switch, capable of printing on black banner ;

▲ The print head anti-collision system can effectively prevent head damage during printing.

1024	6PL	6PL-24PL	24PL	72.2mm	360DPI (one head one color)

Model	3.2m/5.3m/6.6m giant hybrid UV printer
Printhead	KM1024A SHE 3.2m: 4-24H / 5.3m: 4-36H/ 6.6m: 4-40H
Resolution	1440DPI , 2160DPI
Speed	6.6m: 235m ² /h (6 rows) 5.3m: 220m ² /h (6 rows) 3.2m: 145m ² /h (4 rows)
Color option	CMYK/double CMYK/ CMYK LC LM (White and varnish optional)
Media thickness	0mm~25mm
Lamp	LED lamp
Platform section	8-zone suction / 4-zone suction (adapted to different sizes of materials)
Print type	Roll to roll/ rigid media
Print width	3200mm / 5200mm/6600mm
Ink type	UV curing ink
Option	Front and rear extensional frame desk
Bulk volume	3L bottle with ink alarm, ink filling without pause
Ink supply system	Automatic negative ink supply system
Media type	Glass, ceramic, metal, paper board, leather, wall paper, soft film, PVC, PP, PE
Operation system	Windows 7/10 64bit.RAW≥500G. SSD≥128G.CPU≥Inte i5
RIP software	Photoprint(Caldera for option)
Work environment	Temp.: 18~26℃ to reduce the static Humidity: 40~70% to reduce the static
Power	Max power: 10KW; AC,50HZ/60HZ; 220V(±10%)>45A
File format	Tiff,JPEG,EPS,PDF
Machine dimension	9500x2300x1900mm option Front and rear extensional frame desk (6.6m) 8194x2162x1772mm option Front and rear extensional frame desk (5.3m) 5970x1600x1640mm option Front and rear extensional frame desk (3.2m)
NW/GW	8000kg (6.6m) / 6000kg (5.3m) / 2200kg (3.2m)
Security Certificate	CE

5.3m large format 4 rubber roller
UV RTR printer

Focus on high speed UV printing,
to meet the customer's satisfaction

The whole roll of soft film is printed in one shot

Improve stability and accuracy
in an all-round way

220m²/h

4 row KM1024A

- 1. Separately color cleaning button and sub ink tank pre-heating, full head plate pre-heating
Convenient maintenance heads and constant temperature control for ink supply;
- 2. X Linear motor& metal raster movement system
High precision printing and stable running
Water-cooled printing platform & adjustable suction area
One-piece printing platform with water cooling and adjustable vacuum suction;
- 3. 4 rubber roller Y movement system
Machine Y movement with double 1.5KW servo motor, stable moving when printing;

- 4. Auto/ Manual Tension system
Front Y roller with software auto tension and manual adjustable tension system,
This make meidia no wrinkle and tight when printing;
- 5. Multi-roll printing support
Machine support 2 or more Rollers printing in one time.

Machine Model	5.3m large format 4 rubber roller UV RTR printer
Printhead Model	KONICA1024I-6PL/1024I-13PL/1024A
Printhead No:	Optional 24pcs, 4row*6
Resolution	1440 dpi,2160 dpi
Output (4rows)	Draft mode: 212m ² /h
	Production mode: 170m ² /h
	High-precision mode: 87m ² /h
Maximum media width	5.3m
Maximum media thickness	1.5mm
Applicable media	Soft film, knife scraping cloth, car sticker, banner,lamp film and other various coils
Ink type	Soft UV ink
Ink color	C、M、Y、K、W
Machine size (L*W*H)	8350MM*1615MM*2040MM
Machine NW	7070KG
Machine GW	8055KG
Power	10.6KW (46A)
Electricity	230VAC.50HZ/60HZ L/N/PE
Rip software	PHOTOPRINT , CALDERA
UV Curing method	LED lamp
Data transmission method	High-speed USB3.0 transmission
Environmental requirements	Independent, clean, low-light, well-ventilated workplace
	Environmental temperature: : 18℃ ~ 30℃ (64°F ~ 86°F)
	Relative humidity: 30% ~ 70% (no condensed)

E320 UV Pro Blance Rubber Roller Printer

3 rows/ 2 rows KM Atom printhead(1024A)

**Improve stability and accuracy
in an all-round way**

Compatible with all kinds of materials, especially suitable for soft film, Pearl Light Backlit

NEW

169m²/h

**Focus on high speed UV printing,
to meet the customer's satisfaction**

Easy

Two feeding/
collecting
structures

Rubber roller

Pro-balanced tension system

Stable

Imported spareparts

Professional

Water cooling platform

Advantages

1. It can print whole roll media in one shot. Each material portion is close to the platform surface to ensure every ink drop be right on the accurate position and guarantee perfect image quality, especially for back-lit printing.
2. The E320UV system will also handle soft film materials as thin as 0.18mm without any wrinkle or deformation on the prints. Other UV printers with traditional 4 rollers system only allow up to 0.22mm thick media and still commonly have issues with media wrinkle. This E320UV system ensure all high printing quality on all type of backlit film media in this system;
3. Our latest design with the water cooling platform ensure consistent condition to prevent stretch and wrinkle, as well as ensure no deformation on heat sensitive media.

**Patented Technology,
Counterfeiting was strongly prohibited !**

Allwin Printing medias were smoothly tightened on the surface of the printing platform; Allwin printer ensure each droplet was accurately positioned in its designed original position to present the precise jetting performance;
Allwin highly recommend the soft film and any thin substrates printing due to its wrinkle free printing platform design, perfectly avoiding wrinkle attack to the carriage system during the mass printing production.

1. Optimized design of the unwinding structure to meet the printing needs of various materials of external light, internal light and soft film;
2. Compared with the four rubber roller machine, the media loading and unloading is convenient and flexible, reducing the operator workload of changing the material frequently, reducing the tailings. Less material scrap, and reduce production costs;
3. The whole machine cost is low, which is convenient for customers to quickly receive various small orders for production;
4. Densely pinch roller arrangement;
5. Equip with professional feeding system to ensure the accuracy of stepping.
6. The printer adopts a watercooling platform, which is suitable for many printing materials, it can provide long term stable printing for heat-sensitive materials such as soft films and car stickers;
7. The optimized design supports double rolls of media printing at the same time, one machine is equivalent to two-machine. Compared with the traditional rubber roller UV printer, at least 1 meter media is saved each production.

KONICA 1024A Atom printhead compare with competitors

1. Head length 72.2mm, each pass print length 33% more;
2. Ink dot 6PL-18PL changeable (Max 24PL) each nozzle inkjet 20-60% more ink volume, more suite for solid color printing;
3. Head physical precision 360DPI, 20% more , decrease banding in solid color printing.

Machine Model	3.2M Pinch roller UV Machine
Printhead model	KONICA1024I-6PL/1024I-13PL/1024A
Printhead control	Software adjust printhead temperature and voltage
Printhead configuration	CMYK+W / CMYK+LCLM
Maximum printing width	3.2M
Maximum printing Resolution	1440 DPI, 2160 DPI
Ink type	UV ink
Color configuration	CMYK+W or CMYK+LCLM (Optional)
Ink supply method	Vacuum negative pressure automatic continuous ink supply
Drying device	UV LED Curing
Package size	5000mm(L)*1050mm(W)*1630mm(H)
Machine size	4840mm(L)*1320mm(W)*1560mm(H)
Machine GW	1135 KGS
Machine Voltage	220V AC, 50HZ/60HZ
RIP software	Photoprint/Caldera

1024	6PL	6PL-24PL	24PL	72.2mm	360DPI (one head one color)

ALLWIN new launch KONICA 1024A Atom printhead machines series include: Roll to Roll UV, UV Flatbed, Hybrid UV. Production speed up 30%.

With the original certified Japanese brand UV ink (hard/flexible/neutral), it brings more accurate color reproduction, finer color presentation, and smoother color level transition to the picture, meeting the needs of advertising, home decoration, exhibition display, and logoSignage and other customer needs in different industries!

- ◆ 4 rows/4 colors
- ◆ Double 6 colors+double row of white
- ◆ Various color configuration between color and white
- ◆ 3 rows/4 colors
- ◆ White+color+varnish
- ◆ Double CMYK+ double white

Machine model	UV2513/UV3225 (special order)	
Printhead brand	KONICA1024I-6PL/1024I-13PL/1024A	
Printhead arrangement	4C+1W ; 4C+4C; 4C+4C+2W ; 4C+4C+4C+4C (Optional as required)	
Color option	C/M/Y/K/LC/LM/W/V	
Printing size	1300mmX2500mm & 3200mm×2500mm	
Printing height	100mm (Customized height to 450mm)	
Printing media	Acrylic, wooden board, leather, phone shell, ceramic, glass, metal etc.	
Negative pressure control system	Double negative pressure / positive&negative pressure alternative control	
Printhead cleaning	Separate color purge , automatic cleaning system	
Platform type and resolution	Sectional aluminium alloy platform with scales, deviation less than 0.1mm	
Ink circulation system	White ink circulation, automatic stirring system to avoid printhead clog	
Ink tank volume&ink level alarm	4L ink tank with ink level alarm equipment	
Data transfer	USB3.0 standard port	
Rated voltage and power	220V/8000W	
Curing lamp	LED	
Servo motor	Imported motor	
Guide rail	Famous brand muted double guide rail	
Carriage height adjustment	Automatic	
Printhead protection	Intelligent anti-crash equipment	
Working environment	Temperature 20-35℃, humidity30%-70%	
RIP software	PHTOPRINT, CALDERA	
Picture format	Tiff, EPS, PSD, JPG, AI	
Package	Machine	2513: 4450(L)x2250(W)x1450(H)mm / 3220: 5400(L)x2500(W)xH1400(H)mm
	Package	2513: 4400(L)x2360(W)x1750(H)mm / 3220: 5500(L)x2200(W)xH1800(H)mm

KONICA 3 rows of printheads, high speed color option

1. 3 rows of CMYK color option (UV 2513)

Head Mode	Speed	Production mode	High-precision mode
KM Atom printhead (1024a)	3pass	125m ² /h	83m ² /h
	4pass	97m ² /h	67m ² /h
	6pass	67m ² /h	37m ² /h

2. Color+white+varnish color option (UV 2513)

Head Mode	Speed	Production mode	High-precision mode
KM Atom printhead (1024a)	3pass	43m ² /h	36m ² /h
	4pass	33m ² /h	25m ² /h
	6pass	22m ² /h	17m ² /h

3. Double rows of CMYK+ WW color option (UV 2513)

Head Mode	Speed	Production mode	High-precision mode
KM Atom printhead (1024a)	3pass	83m ² /h	63m ² /h
	4pass	63m ² /h	42m ² /h
	6pass	42m ² /h	28m ² /h

KONICA 4 rows of printheads, high speed color option

1. Double 6 colors+ double white option (UV 2513)

Head Mode	Speed	Production mode	High-precision mode
KM Atom printhead (1024a)	3pass	83m ² /h	63m ² /h
	4pass	62m ² /h	42m ² /h
	6pass	42m ² /h	28m ² /h

2. 4 rows of CMYK color option (UV 2513) suitable for mass production

Head Mode	Speed	Production mode	High-precision mode
KM Atom printhead (1024a)	3pass	144m ² /h	115m ² /h
	4pass	126m ² /h	83m ² /h
	6pass	84m ² /h	52m ² /h

3. Color white color& full color free alternative option

According to the printing demand, the white and color mode can be switched at will.
When there is no need to print white ink, 12 printheads full-color&high-speed printing can be achieved; if white color printing is required, 8 printheads in two rows of color inks + 2 printheads in two rows of white ink and 10 printheads of white and color can print simultaneously.

6 row print head solution (KONICA HS 2000/1024A Atom printhead)

①. 6 row 4 color/ 4 row 4 color solution (CMYK)

Speed	Production mode	High-precision mode
3pass	235m ² /h	160m ² /h
4pass	180m ² /h	120m ² /h

②. 6 row Color white color option (CMYK W CMYK)

Speed	Production mode	High-precision mode
3pass	100m ² /h	50m ² /h
4pass	70m ² /h	35m ² /h

- ◆ Ultra-thin double-sided light box application
- ◆ Shopping mall interior light box
- ◆ White and translucent gradient printing
- ◆ PET transparent film application
- ◆ White printing on glass partition
